

**Paul Wise, M.D., M.P.H.** is the Richard E. Behrman Professor of Child Health and Society at Stanford University and a core faculty member at the Center for Health Policy/Center for Primary Care and Outcomes Research. Before joining Stanford University, he was a Professor of Pediatrics at Boston University and Vice-Chief of Social Medicine and Health Inequalities at Brigham and Women's Hospital. His work has focused on children's health; health-outcomes disparities by race, ethnicity and socioeconomic status; the interaction of genetics and the environment as these factors influence child and maternal health; and the impact of medical technology on disparities in health outcomes. He received his medical degree from Cornell University and his master's degree from the Harvard School of Public Health, and completed a residency in pediatrics at Children's Hospital Medical Center in Boston.
