

Julio Licinio, M.D.

Julio Licinio, M.D. (appt pending) is Associate Program Director of the UCLA General Clinical Research Center and Senior Research Scientist at UCLA's Neuropsychiatric Institute. Dr. Licinio received his medical training from the University of Bahia School of Medicine in Brazil. Dr. Licinio is a scientist in the Pharmacogenetics Research Network, a nationwide research effort sponsored by NIGMS and other NIH components. His primary research interests are in clinical pharmacogenetics and translational investigation of depression and obesity in the Mexican-American population. Other research interests include characterizing neuroendocrine and neuroimmune abnormalities in patients with dysthymia and examining the endocrine effects of leptin treatment in leptin-deficient subjects. He conceptualized, founded and is editor of the journal, *Molecular Psychiatry*, and of the *Pharmacogenomics Journal*.
